SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

The substance is an organic compound, may create in particular conditions (ex. temperature, pressure, powder granulometry, humidity, oxygen concentration) explosive mixtures with air. In case of accidental release remove all sources of ignition and ventilate the area gradually.

10.2 Chemical stability

The substance is stable in normal conditions of temperature and pressure and if stocked in closed containers in cold and ventilated area.

10.3 Possibility of hazardous reactions

The substance is an organic compound, may create in particular conditions (ex. temperature, pressure, powder granulometry, humidity, oxygen concentration) explosive mixtures with air. In case of accidental release, remove all sources of ignition and ventilate the area gradually.

10.4 Conditions to avoid

Keep away from heat, flames, sources of ignition and static discharges.

10.5 Incompatible materials

Strong oxidizing agents, acids and bases.
